Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 8, 9, 10, 12, 14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Beebe. Beebe teaches a method and apparatus including a melting furnace 91) with a melt discharge (7) having a cooling device (8,10,11) where an instrument (19) with an internal cooling mechanism (20,21) is provided, where the edge (22) of the instrument is “sword shaped” and is used to remove pegs or plugs through cutting or splitting away said plugs (see page 2, lines 35-50 for example), where the instrument is actuated by a hydraulic drive means (37,38) thereby showing all aspects of the above claims.

Allowable Subject Matter

Claims 6, 7, 13, 15 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of Lonardi and Winch are also cited as further examples of prior art plug removal methods and apparatus.
